INSTALLATION & USE INSTRUCTIONS:

Ensure that the power has been turned off before attempting installation.

This product should only be installed by a licenced electrician. This product must be installed in compliance with all the requirements set out in AS/NZS 3000 (current edition) and other relevant Standards and Regulations.

T-Bar Installation

- Prepare an opening in the T-Bar system to suit the panel dimension.
- Install a suitable standard three pin socket (240V 10A) adjacent to the mounting point.

Note: Light Nation LED Panel drivers have a 1.5m flex and plug provided.

- Drop the panel light into the T-Bar opening.
- Ensure T-Bar is earthed or bonded.
- Connect the power supply to the panel connection with the polarized connector provided.
- Connect power plug to socket
- Switch on and test.

Note: Use only power supply provided. Use of non standard power supply will void warranty.

Do not modify, bend, or drill the panel. This will void warranty and may create a serious hazard.

DO NOT PLACE DRIVER ON TOP OF, OR UNDERNEATH INSULATION

ALTERNATIVE MOUNTING:

Light Nation also offers a range of alternative mounting options for LED Panels.

These include:

- Flush Mount: for recessing into plasterboard or similar material
- Surface Mount: a tidy solution for the underside of concrete slabs and similar situations.

CARE AND CLEANING:

Periodic cleaning of your LED Panel is the only maintenance that is needed.

- Use only a microfibre cloth to remove dust.
- Avoid using chemical cleaners as some products degrade plastic material and can cause premature failure.
- Do not use water when cleaning as it could damage components and create the possibility of an electrical shock.
